Motion regarding a vegetarian policy

Background

On the previous board meeting, we discussed adding a line in our current Environmental Policy to specify that the Association has a vegetarian policy - as this has been something believed to be true by us board members, but later turned out not to be the case, and rather just a de facto policy created by tradition in the Association.

As the current board, and boards before us, has already been working with a vegetarian norm, this motion will not affect the continued work in any foreseeable negative way.

Motivation

As we the current board already have implemented a vegetarian policy due to the vegetarian norm created over the past few years, it seems reasonable to make it official. With an official policy that clearly states our vegetarian norm, we can further profile ourselves as a modern association that actively takes measures to do our part of combating climate change.

Pleading

May the Board decide to:

agree to add a line in the current Environmental Policy to officially state or vegetarian norm?

Signatories
