

## Motion to approve revised environmental policy

### Background

During the last two board meetings, the board has discussed how to phrase the part of the environmental policy dealing with the association's attitude towards a vegetarian norm. The change compared to the last version is that it has been specified that if we are the buyer of the goods during an event, we buy vegetarian goods. If we are cooperating with a partner and are not ourselves buying the goods, we strive to provide vegetarian goods. After the past two discussions I was tasked with making a final revision of the policy and present it to the board for approval. This is what this motion aims to do. For more background, please consult the meeting documents of the two past meeting available at [ufuppsala.se](http://ufuppsala.se).

### Purpose

The purpose of this motion is to approve the revised environmental policy which has been discussed during the past two meetings. The policy will make it mandatory to buy vegetarian goods when we are the buyer.

### Proposal

Can the board decide to approve the revised environmental policy?
