

## Decision on Purchasing Creative Cloud

### Rapporteur

Isak Lefvert, President

### Proposals

to purchase three (3) separate Creative Cloud for Students plans to the cost of ca 7000 kr

### Pros and Cons

As our subscription to the Creative Cloud package - containing for instance InDesign, Photoshop, Illustrator - is expiring it has to be renewed for our board members and eventual trustees during the year.

Three licenses allow three (3) people working with and Adobe programme at the same time. It also allows the programmes being activated at a total of six (6) separate units. It can be argued that fewer licenses for  $\frac{2}{3}$  of the costs and benefits would be a feasible option as well. However, this would require a higher degree of coordination and planning between several groups and offer less flexibility.

It is probably not Adobe's intention to sell these to an association like ours. However, all of those in whose name the plans will be ordered, are students and thus eligible for the discount we are using.

### Decision

The board decides to purchase the Creative Cloud package.
