

## Material for Decision Point on Redecorating Office

### Proposals

*To spend 30 000kr on new furniture and other things to improve office*

### Motivation

Because of Covid-19 UF spending has gone down immensely. Since we will have loads of grant money to spare, there is room for some investments. As per our last board meeting, the two of us were given the responsibility of purchasing office supplies and furniture.

Our goal for Uffice is mainly to update our furniture, we choose to go with a blue-orange theme since we feel that they compliment each other well and go well along with the world map as well as the UN flag.

Because of the Bunker's lack of windows it is not a very cozy room, but, we hope to change that! We would move the grey office couch into the bunker and buy a carpet, bean bags, and string lights to make the bunker a nicer place to spend time in.

We also want to buy some other fun things, such as board games that are perfect for when we have board game nights, a grill and other nice decorations that will liven up the place.
