

Material for Some Bylaw Questions

Problem

One major function of the bylaws in an association is to stake out the purpose of the operations. That is, not the aim, but the actual subject of what we do. By clarifying this in the bylaws, we set out the course for the association, not changing anything factually from how it is now, but making it clearer for coming generations.

The question is though? How do you summarize UF in one brief sentence? How would you present our associations work to someone who doesn't know it, if you only had 5 seconds?

When this is presented on the meeting there will be a mentimeter, where you can submit some rapid-fire answers! Based on them, we will try to clarify the most important part of our bylaws. Both in Swedish and in English.

Rapporteur

Isak Lefvert, President.
